## German Air Rescue Service

With more than **50 rescue helicopters** (type H145 D2/D3 and EC135/H135) and **37 stations**, the non-profit ADAC Luftrettung is the **largest Helicopter Emergency Medical Service (HEMS) provider in Germany** and one of the largest air rescue organizations in Europe. The ADAC rescue helicopters are part of the German public rescue service system, are exclusively dispatched by the public control center via the nationwide emergency number "112" and are on the spot for any accident victim or any person in need of emergency medical care.

**„Against time and for life“** is the guiding principle of ADAC Luftrettung gGmbH because especially in the case of serious injuries or illnesses, the faster the patient is transported to a suitable hospital or treated on site by our expert emergency physicians, the better their chances of survival or convalescence. Since 2017, ADAC Luftrettung has been a subsidiary of the non-profit ADAC Foundation.

### Facts & Figures

- » **more than 56,000 rescue missions / 50,000 treated patients (per year)**
- » **total flight hours: 30,000 / about takeoff and landings: 125,000 (per year)**
- » **more than 1,2 million rescue missions since 1970**
- » **approx. 1,300 crew members: ~170 pilots, PICUS and hoist operators, 600 doctors and 250 TC HEMS, 150 technicians and administrative staff**
- » **cooperation with hospitals, fire brigades, rescue and disaster relief organizations**
- » **more than 50 helicopters type Airbus H145 D2/D3 and EC135/H135**

## SIMply Experts

The ADAC HEMS Academy is an integrated training center for professional helicopter pilots, medical personnel from all fields of emergency care, and Technical Crew Members in HEMS – with a worldwide unique concept: 50+ customers from more than 25 countries around the globe.

### Train as you fly & Train as you care

- » More than 10 years expertise in helicopter training on Full Flight Simulators (FFS) EC/H135 & EC/H145 - EASA compliant flight training on 3 FFSs, available for all applicable operators with different mission profiles: HEMS, offshore, mountain, night / NVG. We offer custom-made scenario development - our asset: Realistic simulator training in the environment you know!
- » Patient safety and quality of care under complex circumstances is our mission. In our medical training environment we offer a broad course portfolio for out-of-hospital and in-hospital emergency medical care – from standard formats to customized course programs. Especially for international customers we provide in-house courses and customized train-the-trainer programs.

### Human factor training & Consultancy

- » We perform training in Crew Resource Management (CRM) not just to fulfil a legal obligation but with the goal to make multi-professional teams really doing a safer job - in HEMS, in aviation, in emergency care, and in other high-risk environments - adapting our human factor course formats to almost any target group.
- » Providing HEMS is much more than having the right helicopter and well-trained crews. We can facilitate new services in that field in all aspects of providing HEMS – with specialized consultants and the background of more than 50 years of experience in HEMS.
